(54) ELECTRONIC MAIL SYSTEM

(57) Abstract

PROBLEM TO BE SOLVED: To allow a transmitter to perform a corresponding processing for various changes of mails registered for transmission, which are generated to a delivery date by itself.

SOLUTION: In this electronic mail system, the electronic mail server of a cellular phone agent comprises an acceptance means 15 having a retrieval means 12 having the function of retrieving a delivery date-designated mail registered for transmission and waiting for delivery; a mail list presenting means 13 for transferring a list for the delivery date-designated mail registered for transmission by a user to an inquiry from a mobile machine 2 that is the cellular phone; and a re-registration means 14 for re-registering the delivery date-designated mail with changed contents on the basis of the instruction of re-registration from the mobile machine 2. This acceptance means accepts various changes corresponding-processed by the transmitter of the mail including change of mail contents and cancel of mail delivery, which are generated up to the delivery date of the delivery date-designated mail.
